

DESTINATION RISK REPORT

VIETNAM / **PRECAUTION**

BENZOS

DRUG CLASS: Benzodiazepines

COMMON BRANDS: Xanax, Valium, Ativan, Klonopin, Restoril, Librium

RISKS TO TRAVELERS: *Confiscation if documentation is missing / Fines / Other legal actions*

NECESSARY STEPS: Before traveling, verify with the Vietnamese Ministry of Health if your benzodiazepine medication is permitted for personal import. Bring a doctor's prescription and a detailed medical note explaining your condition, dosage, and treatment schedule. Limit your supply to only what is needed for personal use during your trip. Keep your medications in the original, clearly labeled containers. Declare all medications at customs when entering Vietnam to avoid legal complications.

VIETNAM / **PRECAUTION**

OPIOIDS

DRUG CLASS: Opioids

COMMON BRANDS: Oxycontin, Percocet, Percodan, Vicodin, Dilaudid, Tramadol, Codene

RISKS TO TRAVELERS: *Confiscation if undocumented / Fines / Possible imprisonment / Refusal of entry if import approval is absent*

NECESSARY STEPS: Obtain prior authorization from the Ministry of Health of Vietnam before traveling with opioids. Carry a valid prescription and a medical report detailing your condition, dosage, and duration of use. Bring only the quantity required for personal use, typically limited to a 7-day supply. Keep medications in their original packaging with clear labeling. Declare the medications at customs upon arrival.

VIETNAM / **ESCALATED**

CANNABIS

DRUG CLASS: Cannabis

COMMON FORMS: Flower, Oils, Tinctures, Vapes, Pills, Edibles

RISKS TO TRAVELERS: *Confiscation / Arrest / Criminal prosecution / Imprisonment / Refusal of Entry / Severe penalties for possession or trafficking*

NECESSARY STEPS: Do not bring cannabis or any cannabis-derived products into Vietnam. Understand that any involvement with cannabis can lead to serious legal issues. Avoid any association with cannabis during your stay in Vietnam. See Master Services Agreement for additional details [*here*](#).
